About Us

Welcome to The Greenshield Enviro Solutions Pvt Ltd. dedicated to driving circularity and Extended Producer Responsibility (EPR) for used oil.

Greenshield Enviro Solutions Pvt Ltd fosters collaboration between stakeholders and the government, contributing significantly to environmental protection.

Vision

The Greenshield Enviro Solutions Pvt Ltd envisions a sustainable future where used oil circularity is seamlessly integrated, preserving resources and fostering environmental sustainability through collaborative efforts with stakeholders across industries to promote every drop of used oil to be converted into re-refined base oil and used to reduce the carbon footprint, pollution, forex and meeting regulatory compliances.

Our Mission

Our mission at Greenshield Enviro Solutions Pvt Ltd is to transform the management of used oil through the promotion of circular practices and the effective implementation of Extended Producer Responsibility (EPR) Rules. With a diverse coalition of stakeholders, including oil producers, OEMs, bulk used oil generators, recyclers, and collectors, we are forging a unified front by making all the stakeholders members to address the pressing environmental challenges of used oil disposal and adopt the modern global practices and targets.

The Problem

Only 10-15% of used oil is properly recycled due to inadequate collection methods.

Used oil is often burned illegally due to high fuel oil prices, contributing to severe air pollution, high toxins and AQI. Scrap dealers collect and sell used oil for profit. Traders arrange licenses for recyclers, facilitating transactions without accountability in Cash.

Cash Transactions encourage black money and the worst part is lead to the recyclers capacity getting unutilized.

Need for Circular Solutions: Linear models of oil consumption lead to resource depletion and environmental degradation. Extended Producer Responsibility (EPR) compliance ensures that producers take responsibility for the entire lifecycle of their products, including proper disposal and recycling.

Our Solutions

EPR Registration on the CPCB Portal

Transfer of EPR Certificate

EPR Compliance Services

Policy Representation to government and regulators

Regular information on EPR and developments in the sectors

Weekly Events Calendar, Newsletters, Knowledge Papers, Tender information etc.

Facilitate collection and segregation facilities

Industry Collaboration & Advocacy

EPR Solutions & Transparency

Awareness and Capacity Building Programmes

Discounted Testing & Collection Capacity
